## **PA POWERHOUSE**

Harrisburg: ONLINE would like to thank the electric distribution companies and their linemen and crews, the power generating plants and operators, and the natural gas distribution companies and their workers and leadership who kept the lights on and our heat flowing during Winter Storm Fern and the subsequent arctic blast. The utilities that bring power to your homes and businesses in 13 states (including PA) and D.C. are knit together by the regional grid operator, PJM Interconnection, and its control room operators, wholesale power markets, and planners. PJM saw sustained high energy demand over the course of 10 days (over 130 GW on all but one day) that approached the all-time winter peak of 143.7 GW set last winter. The commitment by Valley Forge-based PJM and its member utilities to reliability of the electric system remains unparalleled. Thank you for keeping our lights on, our beer cold, and our homes warm.

Spain is following in the footsteps of Australia by banning access to social media platforms to children under 16 years of age.
